

VueturaTrac™ Mobile Client

- *Mobile devices used by delivery personnel allow them to capture location and recipient of package, signature, and notes regarding their delivery or delivery attempt.*
- *Validation of employees through their ID badge (barcode scanning, magnetic stripe, RFID, Proximity Card, and manual entry) ensures chain of custody as ownership moves from the delivery personnel to the intended recipient.*
- *Upload details wirelessly or through cradle devices connected to your internal network.*

VUETURATRAC MOBILE CLIENT FEATURES

Dockside Parcel Validation:

Quick tracking number scanning at the dock provides benefits including piece count validation with UPS/Fed Ex during offload at the dock, 100% visibility as items arrive at the dock and are pending processing.

Damaged Parcel & Manifest Reconciliation:

Notes are recorded as well as the option to capture delivery driver name, manifest information and driver signature.

Signature Capture, Employee ID Swipe/Scan:

Who signed for the parcel? Employee badge numbers are linked to the employee database and used with the signature to ID the delivery.

Employee badge validation:

Notifies the operator that an employee badge, when swiped or scanned, is invalid.

Record Re-Routes and/or Alternate Delivery Instructions:

Operators quickly document any deviations in the delivery instructions. Dates and times associated with those transactions are recorded.

About **Vuetura**

Powerful results

VueturaTrac gives you complete control and detailed oversight of visitor and package tracking, process automation, and supply chain management.

What makes VueturaTrac so great?

🚀 Speed and Efficiency

With VueturaTrac manual processes become automated, streamlined, accurate, faster and much, much less costly.

👍 100% Visibility

With just a few clicks, you can find any package and/or person in your facility and access its complete history.

📈 Rapid ROI

Customers report 400% or more three-year ROI, and the system frequently pays for itself in under a year.

⚙️ It seamlessly integrates with the big systems

VueturaTrac can integrate between one or more external host database systems or data warehouses.

We are tracking experts with an intelligent, user-friendly framework built to give you complete control and detailed oversight of all tangible items within your organization—receiving & delivery tracking, lobby and visitor security, supply chain management and more.
