

VueturaTrac™ Reporting & Historical Review Features

More than 25 standard receiving reports are included. These reports provide statistics regarding package, carrier, building, and user detail. All of our reports can be exported for additional data mining and display.

The VueturaTrac Report Writer allows customers (IT Departments) to write their own reports which can be published across all the licensed installations. For your convenience we also include the package query tool, which allows users to quickly search and retrieve specific package details. Prior to installation, your Vuetura project manager will work with you and your team to identify any custom reports that may be necessary to ensure that you have the necessary reports in place, prior to your "Go Live" date.

Our robust History lookup form provides users with several options when it comes to retrieving data. Once the data is returned, detailed information such as dockside scans, package information (sender, carrier, recipient, etc.), and delivery scans including signature are quickly viewable, and can be printed or emailed for further review.

Wildcards Searches in the search fields, assist where incomplete data is provided by the customer. This is an extremely valuable tool for those in your organization performing historical searches.

Badge Type - Visitor Badge 2

Features:	Benefits:
Scans express package label barcodes	Reduces data entry time, improves accuracy by eliminating data entry errors.
Packages routed using employee identifiers	Flexible addressing to match your organization's needs and processes.
Track packages in real-time	Increases customer service, accountability, security, and minimizes fraud.
MyVue & WebTrac Interface	Eliminates customer service calls to the receiving department. Allows employees to search for and track their own packages from their desktop.
Automatic E-mail & Text Notification	Recipient is aware of when their package will be delivered; this will reduce calls to customer service.
Integration with employee databases to route packages	Reduces data entry time and increases accuracy.
Watches and Security Alerts	Improves security by alerting processors of special handling, refusal, or any desired action.
Reports	View and print a limitless number of reports. These can be exported to excel, or viewed as color graphs and charts.
Scalability	Grows with your organization from processing dozens of packages a day to thousands.

Powerful results

VueturaTrac gives you complete control and detailed oversight of visitor and package tracking, process automation, and supply chain management.

What makes VueturaTrac so great?

Speed and Efficiency

With VueturaTrac manual processes become automated, streamlined, accurate, faster and much, much less costly.

100% Visibility

With just a few clicks, you can find any package (and person?) in your facility and access its complete history.

Rapid ROI

Customers report 400% or more three-year ROI, and the system frequently pays for itself in under a year.

It seamlessly integrates with the big systems

VueturaTrac can integrate between one or more external host database systems or data warehouses.

About Vuetura

We are tracking experts with an intelligent, user-friendly framework built to give you complete control and detailed oversight of all tangible items within your organization— receiving & delivery tracking, lobby and visitor security, supply chain management and more.

Vuetura

Advanced tracking. **Powerful results.**
