
COMPANY OVERVIEW:

About Vuetura:

Redmond, WA-based Vuetura is a software development and service company. We are a leading provider of advanced tracking solutions for the healthcare supply chain, package and mail receiving systems, and for visitor and lobby management software. Some of the world's top companies and healthcare organizations are on our client list, and these customers want the powerful results that come from our combination of easy-to-use tracking software and full-circle client solutions. Since 1987, we've focused on automated receiving, delivery, and tracking solutions that provide 100% accountability and 100% visibility. Vuetura's suite of advanced tracking applications is in use by healthcare providers, Fortune 1000 companies, and universities around the world.

Vuetura is a Veteran-owned, made in the USA small business.

AREAS OF BUSINESS:

- Receiving and delivery tracking
- Supply chain management solutions
- Lobby and visitor security
- Inventory management
- Inbound logistics
- Order management
- Proof of delivery
- Process improvement

CORE COMPETENCIES:

- Producing measurable results. Our complete tracking solutions and best practices save time, money, and man hours by dramatically improving operational efficiency in hospitals, corporations, and public institutions
- On-time and on budget implementation, project management, and training.
- Over 200 years combined experience in logistics and process optimization.
- Supply chain expertise. Vuetura is a contributing member of GSI Healthcare US and presently consults with healthcare clients on electronic commerce and supply chain intelligence.

HISTORY:

Vuetura's history is built on years of customer success. Recognized for logistic management knowledge and automated computer solutions, Vuetura has a long history of software innovation and consulting services. Since our first product launched in 1986, we've been at work continually improving our already leading-edge software while honing our knowledge of inbound logistics, process improvement, and supply chain management.

BENEFITS:

Benefits of VueturaTrac:

VueturaTrac™ tracks and records individuals and items and as they enter, move-about, or exit a facility or supply chain, and then utilizes the operational and transaction data to effectively measure and evaluate process performance. Here are some of its benefits...

- Speed and efficiency. With VueturaTrac manual processes become automated, fast, more precise, and way more cost efficient.
- 100% visibility and 100% accountability of all tangible items coming into a facility.
- Improve customer satisfaction. Respond to “Where’s my package?” calls quickly and empower employees to check the status of their own packages, create alerts, and receive email notifications.
- Scalability. Highly extensible and scalable to grow with your organization. The database can be located on an internal enterprise server or remotely hosted in one of our secure data centers.
- Installation and ease-of-use. It’s simple to install and easy to use: Staff can be trained and processing packages within one day.
- It’s multi-functional. The VueturaTrac Transaction Framework is made up of web components, mobile interfaces, and robust client software, using Microsoft SQL Server as its relational database.
- Our flexible, scalable, vendor-neutral technology easily integrates into existing ERP/MMIS systems for one-step order confirmation and exception management.
